

Back End Developer (Experience: 0-3 yrs)

Do you like solving problems, and writing elegant code? Are you always finding out ways to make your product performance better by finding out methods to innovate and add cool features? Are you always finding ways to beat the standards and learn something new...

Join us @ConveGenius as we love innovating in the mobile space. Our team is all set to make education FUN and REWARDING and achieve scales as a market leader for edutainment solutions in India. We are looking for a Back End Developer to code some awesomeness and bring in some cool new features to our product. The role is to focus on the back end, server side architecture, development of APIs and working with optimized databases

Responsibilities:

- Working on Full-stack and Architecture level implementations
- Code APIs and work on server side databases.
- Fix bugs and strive to improve application stability and performance.

Requirements:

- 2+ years of experience on server side coding, Node JS, (Knowing JabberD and Erlang will be given brownie points)
- Experience with MySQL, NoSQL databases like dynamo DB and MongoDB.
- Knowledge of Redis, Elastic Search, Load balancing in AWS etc.
- Experience of writing REST APIs and working on optimized endpoint architectures.(XMPP, HTTP and Sockets)
- Experience with PHP scripting.
- Excellent problem-solving skills and experience with GIT.
- Strategic thinking from the application perspective.
- Analytical thinking in terms of innovation for the problems we are trying to solve and how we can incorporate technology to solve them.
